1. Introduction

This document discusses the installation of PurePath Console2. It covers installing and updating both the installer .exe file as well as the .ppc2 plugins. The PurePath Console2 installer does not ship with any target plugins built-in, so any desired .ppc2 files must be included with the .exe file.

1.1 Installation

PurePath Console2 is installed by double-clicking the setup_PurePath_Console2_2.1_revXXXX.exe where XXXXX is the revision number of the current build. As noted in the introduction, no plugins are included in the PurePath Console2 installer.

To automatically install plugins, please download them and place them in the same directory as the .exe when initiating an installation. See <u>1.1.2 Plugin Installation</u> for more detailed information.

1.1.1 Installer .exe Installation

The installation process has multiple screens, which follow the standard Windows installation process:

PurePath Console2 2.1 - InstallShield Wizard	PurePath Console2 2.1 - InstallShield Wizard

Installing PurePath Console2 2.1 The program features you selected are being installed. Please wait while the InstallShield Wizard installs PurePath Console2 2.1. This may take several minutes.	InstallShield Wizard Completed The InstallShield Wizard has successfully installed PurePath Console2 2.1. Click Finish to exit the wizard.
Status: Copying new files	
InstallShield	< Back Finish Cancel

1.1.2 Plugin Installation

There are two ways to install a plugin:

- 1. If there are .ppc2 files in the same directory as the installer when the installer is launched, those target .ppc2 files will be automatically installed during the installation process.
- 2. Running PurePath Console2 and adding a target. This is achieved by:
 - Clicking the TI logo in the upper left corner and selecting "Add Target"

PurePath Console2 Installation Guide

Page 5 of 7

• Clicking "Open". At this time, PurePath Console2 will automatically load this target if it is the only target available, or restart itself if multiple targets are installed.

1.2 Plugin Upgrade

At this time, there is no mechanism for updating PurePath Console2 plugins alone— Instead, plugins are updated along with their respective installer. In order to update an installer or plugin, PurePath Console2 must first be uninstalled. Please follow <u>1.3 Uninstallation</u> for instructions on the uninstall procedure.

After the uninstall of the old version is complete, the new version of the installer and matching plugins may be installed using the standard installation method described in section <u>1.1 Installation</u>.

1.3 Uninstallation

Uninstallation is done through the Windows start menu:

- 1. Select Texas Instruments Inc -> PurePath Console2 2.1 -> Uninstall PurePath Console2
 - Texas Instruments Inc
 PurePath Console2 2.1
 PurePath Console2
 Uninstall PurePath Console2

Windows Installer	×
Are you sure you want to uninstall this product?	

PurePath Console2 2.1				
Please wait while Windows configures PurePath Console2 2.1
